Phone: +420 737444728

SUMMARY

- Passionate, product oriented software engineer who cares about code, quality, and great user experience
- Development of native mobile apps on iOS platform: 7+ years
- Development in Swift: 4+ years, Objective-C: 5+ years
- Experience with the whole development process, from specification through the design to The App Store
- Experience with automated testing, build automation, Continuous Integration and Delivery ([Fastlane](#))
- Experience with ticketing, mobile payments, integration with PSP systems
- Web application development in PHP 5 ([Nette framework](#)) and MySQL: 5 years
- Minor experience with programming in: Python, C/C++, C# (.NET), JavaScript (jQuery), SQL, Bash
- Language: Czech (native), English (3+ years on a professional level)
- Self learner: WWDC videos, iOS dev podcasts, blogs, contributor to OSS [GitHub](#) and [StackOverflow](#)
- Co-organizer of CocoaHeads meetup in Prague

WORK EXPERIENCE

[GoOut](#)

2016 - now, Prague (CZ)

Lead Software Engineer - iOS. As a full-time engineer, my responsibility was to design, develop, and successfully release the first iOS app for GoOut. GoOut is a culture guide, ticketing system, and social network. I was a key part of the agile development process, involved in estimating, planning, and design. My role included researching and designing new features, integration analysis, API design, integration with Payment Service Providers (PayU, Paymill), profiling and fine-tuning app performance, and finally maintenance.

Tech: Swift 3-4, CoreData, Realm, ReactiveSwift, MVVM-C, CI, Fastlane, I10n/i18n, push notifications, XCTest, XCUITest, GCD

Released apps:

- [GoOut - Best Events Wherever You Are](#)

[Mailcloud](#)

2014/10 - 2015/10, London (UK)

Senior Software Engineer - iOS. Mailcloud is a cloud storage, email client and chat, all in one app. As a full-time on-site engineer, my goal was to transform an early prototype developed by an in-house team into a full, fast, and reliable application. I was a key part of the agile development process, involved in estimating, planning, and design. My role included researching and designing new features like chat, integration analysis with existing systems, implementation, and profiling performance.

Technologies: Swift 1-2, ObjC, CoreData, GCD and multithreading, iOS 8, Dynamic Frameworks, JSON

Released apps:

- [Mailcloud - File Manager with Cloud Storage](#)

[CellPoint Mobile ApS](#)

2012 - 2014/10, Copenhagen (DK)

Full-stack mobile and backend application developer, working both onsite and remotely. Responsible for iOS app development from initial client meetings, ideation, and prototyping through requirement specification, system integration to the App Store release. Part of my work also includes implementation of backend for services like mRetail and mPoint providing payment processing and server support for mobile clients. Working on apps used by 100 000s of monthly active users.

CellPoint Mobile provides commerce orchestration infrastructure for clients like Emirates, Danish Railways, PizzaHut and eTakeaway.

Technologies & SW: JIRA, iOS SDK, Objective-C, PHP, XML, XSL, XSD, PostgreSQL

Projects:

- KARLA - concept of an iOS application for KARLA restaurant allowing users to book, order and pay for meals and drinks on their phones.
- [ValetParker](#) - concept of an iOS application allowing users to pay for parking on their phones
- [DSB WildCard](#) - ticketing iOS application allowing users to purchase loyalty card and tickets for trains, over 25.5k monthly active users

Inmite s.r.o. (Avast Mobile)**2011 - 2012, Prague (CZ)**

Worked remotely as a part-time/student and designer mainly focused on the front-end. Inmite s.r.o was one of the biggest Czech agencies developing applications for mobile devices with clients like Vodafone, Google, Czech Television. Inmite was acquired by Avast Software in 2014.

Technologies: iOS SDK, SVN, XML, JSON

Projects:

- [Vodafone galerie](#) - Entertainment application for customers of the Czech branch of mobile network operator Vodafone
- [Europa 2 NEW!](#) - Internet radio player application

DH System s.r.o.**2009, Brno (CZ)**

Worked remotely in a team of software developers as a PHP programmer. Focus on designing and coding user interface as well as implementing business logic.

Project: DH MODEL - SaaS tool for rating quality of processes in a company according to the European Excellence Model - EFQM.

Technologies: PHP, HTML, CSS, Nette framework, dibi, jQuery, Firebird, Git, SVN

EDUCATION**[Technical University of Denmark](#)****2011 - 2014**

Program: [Digital Media Engineering](#), study line Web 2.0 Services and Mobile Applications

Academic Degree: Master of Science

Projects: [Mind the Checkout](#) - iOS application, location based reminder for iPhone

Master project: Mobile Sensing for iOS - iPhone application tracking user's movement, wifi networks, etc.

Main Subjects:

- Mobile Application Prototyping
- Personalization and Metadata Models
- Agile Digital Media Development
- Python Programming
- Machine Learning and Data Modeling
- User Experience Engineering
- Cognitive Science
- Advanced iOS Application Development
- Knowledge-based Entrepreneurship
- Business Models for Digital Media Engineering
- Programming in C++
- System Integration

[VŠB - Technical University of Ostrava](#)**2007 - 2011**

Major: Information and Communication Technology with focus on Computer Science and Technology

Academic Degree: Bachelor of Science

Bachelor project: Development of Internet Booking System in PHP for golf indoors (in a collaboration with company Brain Computers)

Main subjects:

- Processor Architecture, Low Level and Realtime Systems in Assembler/C
- Programming in C# and C/C++
- Development of Internet Applications and Information System Development
- User Interfaces
- Scripting Programming Languages and Applications

[SPŠEI Kratochvílova - Secondary Technical School in Ostrava](#)**2003 - 2007**

Major: Electronic Computer Systems - focus on low level and realtime computer systems

Graduated with honors.

Practical graduation project - online system for selling used books (web application in PHP)

HOBBIES

- Photography - I love taking pictures with my iPhone ([instagram.com/krajaac](https://www.instagram.com/krajaac))
- Coffee - love for good coffee taught me how to brew using Aeropress, dripper and espresso machine
- Sailing, snowboarding, skiing, mountain biking, running
- Golf (Just started, handicap 45)
- Design & architecture
